INDEX OF AUTHORS

Volume VII

Transactions of American Society for Steel Treating

January, 1925—June, 1925

B

Benedicks, C. 445
Burgess, C. O. 486

C

Collins, E. F. 82
Cowdrey, I. H. 244

D

Dearden, W. H. 445
Doyle, J. A. 101

G

Grotts, Fred 735
Guthrie, R. G. 4, 337

H

Harper, J. F. 237
Heindlhofer, K. 34
Hutchison, E. W. 657

K

Knowlton, H. B. 379, 743
Krivobok, V. N. 457

L

Loebell, H. O. 107
Lund, K. G. 445

M

Mathews, J. A. 147
McAdam, Jr., D. J.....54, 217, 581
Merten, W. J. 23, 718
Mitchell, W. M. 618
Moser, Max 297

R

Rodman, Hugh 635

S

Schaefer, A. O. 699
Schwartz, H. A. 518
Shepherd, B. F. 774
Sisco, F. T.....197, 363, 494, 640
Smith, R. H. 569
Spring, L. W. 657
Swander, C. B. 727

V

Vanick, J. S. 171
Vilella, J. R. 486

W

Wood, W. P. 321
Wright, F. L. 34

INDEX OF SUBJECTS AND AUTHORS OF PAPERS

VOLUME VII

TRANSACTIONS of American Society for Steel Treating

January, 1925—June, 1925

A

Abstracts of Technical Articles 267
420
534
804

Air Craft Propeller Hubs; Metallurgical Engineering of—*W. J. Merten* 718

Alkalies in Carburizing Compounds; Specific Effect of— *Hugh Rodman* 635

Alloy or Nickel Steel Bars Containing Nickel Without Their Removal from the Stock Racks; Quick Qualitative Test for—
L. W. Spring and E. W. Hutchison 657

Alloy Tool and Special Steels; Comments on the Making and Use of—
J. A. Mathews 147

Alloys of Nickel and of Copper, Endurance Properties of—
D. J. McAdam, Jr.
Part I 54
Part II 217
Part III 581

Alloys; Secondary Crystallization in Iron-Carbon— *V. N. Krivobok* 457

B

Ball Steel Tempered at Various Temperatures; Density and X-Ray Spectrum of Hardened— *K. Heindlhofer and F. L. Wright* 34

Baths for the Prevention of Soft Spots in Quenched High Carbon and Carburized Steels; Fused Salt— *W. J. Merten* 23

Bars Containing Nickel Without Their Removal from the Stock Racks; Quick Qualitative Test for Nickel or Alloy Steel—
L. W. Spring and E. W. Hutchison 657

Brinell Hardness Scales; Relation Between Rockwell and—*I. H. Cowdrey* 244

B. T. U.; Intrinsic Value of Heat Sources Versus the Fluctuating Economic Value of the— *E. F. Collins* 82

C

Carbon and Carburized Steels; Fused Salt Baths for the Prevention of Soft Spots in Quenched High— *W. J. Merten* 23

Carbon Steel; Some Physical Properties of Low— *R. H. Smith* 569
Carburized Objects; Carburizing and Heat Treatment of—*B. F. Shepherd* 774
Carburizing and Heat Treatment of Carburized Objects—*B. F. Shepherd* 774
Carburizing Compounds; Specific Effect of Alkalies in— *Hugh Rodman* 635
Carburized Steels; Fused Salt Baths for the Prevention of Soft Spots in Quenched High Carbon and— *W. J. Merten* 23
Cast Iron; Heat Treatment of— *Fred Grotts* 735
Causes and Controlling Factors in the Corrosion of Iron and Steel— *W. P. Wood* 321
Chemical Analysis—Quick Qualitative Test for Nickel Steel Bars or Alloy Steel Bars Containing Nickel Without Their Removal from the Stock Racks— *L. W. Spring and E. W. Hutchison* 657
Chemistry of Iron and Steel— *F. T. Sisco* 197
363
494
640
Comment and Discussion 261
406
790
Comments on the Making and Use of Alloy Tool and Special Steels— *J. A. Mathews* 147
Compounds; Specific Effect of Alkalies in Carburizing— *Hugh Rodman* 635
Controlling Factors and Causes in the Corrosion of Iron and Steel— *W. P. Wood* 321
Copper and Nickel Alloys; Endurance Properties of—*D. J. McAdam, Jr.*
Part I 54
Part II 217
Part III 581
Corrosion of Iron and Steel; Causes and Controlling Factors in the— *W. P. Wood* 321
Costs of Heat Treated Steel; Gas as a Factor in Improving Quality Standards and Lowering Production— *H. O. Loebell* 107
Crystallization in Iron-Carbon Alloys; Secondary— *V. N. Krivobok* 457
Curves; Some Fundamental Factors for Obtaining Sharp Thermal— *C. Benedicks, K. G. Lund and W. H. Dearden* 445

D

Deep Etching; Some Revelations by— *J. F. Harper* 237
Density and X-Ray Spectrum of Hardened Ball Steel Tempered at Various Temperatures— *K. Heindlhofer and F. L. Wright* 34
Dies; Heat Treatment of High Speed Steel— *C. B. Swander* 727
Discussion of Papers by Messrs. Collins, Doyle and Loebell..... 123

E

Economic Value of the B. T. U.; Intrinsic Value of Heat Sources Versus the— *E. F. Collins* 82
Endurance Properties of Alloys of Nickel and of Copper— *D. J. McAdam, Jr.*
Part I 54
Part II 217
Part III 581
Enlargement; Resolving Power and Magnification— *W. M. Mitchell* 618
Etching; Some Revelations by Deep— *J. F. Harper* 237
Examination; Polishing of Iron and Steel Specimens for Metallographic— *C. O. Burgess and J. R. Vilella* 486

F

Facts and Principles Concerning Steel and Heat Treatment— *H. B. Knowlton*
Part I 379
Part II 743
Forgings; Manufacture and Heat Treatment of Large—*A. O. Schaefer* 699
Fuels for the Heat Treatment of Metal; Selection of— *J. A. Doyle* 101
Fundamental Factors for Obtaining Sharp Thermal Curves— *C. Benedicks, K. G. Lund and W. H. Dearden* 445
Fused Salt Baths for the Prevention of Soft Spots in Quenched High Carbon and Carburized Steels— *W. J. Merten* 23
Fundamental Facts and Principles Concerning Steel and Heat Treatment— *H. B. Knowlton*
Part I 379
Part II 743

G

Gas as a Factor in Improving Quality Standards and Lowering Production Costs of Heat Treated Steel— *H. O. Loebell* 107

H

Hardened Ball Steel Tempered at Various Temperatures; Density and X-Ray Spectrum of— *K. Heindlhofer and F. L. Wright* 34
Hardness Scales; Relation Between Rockwell and Brinell—*I. H. Cowdrey* 244
Hardness Testing Symposium at Boston Convention, September, 1924 244
Heat Sources Versus the Fluctuating Economic Value of the B. T. U.; Intrinsic Value of— *E. F. Collins* 82
Heat Treated Steel; Gas as a Factor in Improving Quality Standards and Lowering Production Costs of— *H. O. Loebell* 107
Heat Treatment and Carburizing of Carburized Objects—*B. F. Shepherd* 774

Heat Treatment and Manufacture of Large Forgings— *A. O. Schaefer* 699
Heat Treatment of Cast Iron— *Fred Grotts* 735
Heat Treatment of High Speed Steel Dies— *C. B. Swander* 727
Heat Treatment of Metal; Selection of Fuels for the— *J. A. Doyle* 101
Heat Treatment of Steel; Facts and Principles Concerning— *H. B. Knowlton*
Part I 379
Part II 743
High Carbon and Carburized Steels; Fused Salt Baths for the Prevention of Soft Spots in Quenched— *W. J. Merten* 23
High Power Magnification in Metallography— *R. G. Guthrie* 4
High Power Photomicrography; Sample Preparation for— *R. G. Guthrie* 337
High Speed Steel Dies; Heat Treatment of— *C. B. Swander* 727
Hubs; Metallurgical Engineering of Air Craft Propeller— *W. J. Merten* 718

I

Impact Test Results; A New Method of Interpreting Notched-Bar— *Max Moser* 297
Intrinsic Value of Heat Sources Versus the Fluctuating Economic Value of the B. T. U.— *E. F. Collins* 82
Iron and Steel; Causes and Controlling Factors in the Corrosion of— *W. P. Wood* 321
Iron and Steel; Chemistry of— *F. T. Sisco* 197, 363, 494, 640
Iron and Steel Specimens for Metallographic Examination; Polishing of— *C. O. Burgess and J. R. Vilella* 486
Iron-Carbon Alloys; Secondary Crystallization of— *V. N. Krivobok* 457
Iron; Heat Treatment of Cast— *Fred Grotts* 735

L

Large Forgings; Manufacture and Heat Treatment of— *A. O. Schaefer* 699

M

Magnification in Metallography; High Power— *R. G. Guthrie* 4
Magnification, Resolving Power and Enlargement— *W. M. Mitchell* 618
Making and Use of Alloy Tool and Special Steels; Comments on— *J. A. Mathews* 147
Manufacture and Heat Treatment of Large Forgings— *A. O. Schaefer* 699
Metal; Selection of Fuels for the Heat Treatment of— *J. A. Doyle* 101

Metallographic Examination; Polishing of Iron and Steel Specimens for—
C. O. Burgess and J. R. Vilella 486
Metallography; High Power Magnification in— *R. G. Guthrie* 4
Metallurgical Engineering of Air Craft Propeller Hubs— *W. J. Merten* 718
Meteorites; Microstructural Features of Several— *J. S. Vanick* 171
Method of Interpreting Notched-Bar Impact Test Results— *Max Moser* 297
Microstructural Features of Several Meteorites— *J. S. Vanick* 171

N

New Method of Interpreting Notched-Bar Impact Test Results—
Max Moser 297
Nickel and Copper Alloys; Endurance Properties of—*D. J. McAdam, Jr.*
Part I 54
Part II 217
Part III 581
Nickel or Alloy Steel Bars Containing Nickel Without Their Removal from the Stock Racks; Quick Qualitative Test for—
L. W. Spring and E. W. Hutchison 657
Notched-Bar Impact Test Results; A New Method of Interpreting—
Max Moser 297
Notes from the U. S. Bureau of Mines..... 415
Notes from the U. S. Bureau of Standards 265
413
529
660

P

Propeller Hubs; Metallurgical Engineering of Air Craft—*W. J. Merten* 718
Properties of Alloys of Nickel and of Copper; Endurance—
D. J. McAdam, Jr.
Part I 54
Part II 217
Part III 581
Photomicrography; Resolving Power, Magnification and Enlargement—
W. M. Mitchell 618
Photomicrography; Sample Preparation for High Power—*R. G. Guthrie* 337
Physical Properties of Low Carbon Steel— *R. H. Smith* 569
Polishing of Iron and Steel Specimens for Metallographic Examination—
C. O. Burgess and J. R. Vilella 486
Principles and Facts Concerning Steel and Heat Treatment—
H. B. Knowlton
Part I 379
Part II 743
Production Costs of Heat Treated Steel; Gas as a Factor in Improving Quality Standards and Lowering— *H. O. Loebell* 107
Pyrometry— *H. A. Schwartz* 518

Q

Quenched High Carbon and Carburized Steels; Fused Salt Baths for the Prevention of Soft Spots in— *W. J. Merten* 23

Question Box 131
417
532
663
796

Quick Qualitative Test for Nickel Steel Bars or Alloy Steel Bars Containing Nickel Without Their Removal from the Stock Racks— *L. W. Spring and E. W. Hutchison* 657

R

Relation Between Rockwell and Brinell Hardness Scales—*I. H. Cowdrey* 244

Report of Sub-Committee on Spring Steels..... 696

Report of Sub-Committee on Tool Steel 564

Resolving Power, Magnification and Enlargement— *W. M. Mitchell* 618

Revelations by Deep Etching— *J. F. Harper* 237

Reviews of Recent Patents 133
269
423
536
666
800

Rockwell and Brinell Hardness Scales; Relation Between—*I. H. Cowdrey* 244

S

Salt Baths for the Prevention of Soft Spots in Quenched High Carbon and Carburized Steels; Fused— *W. J. Merten* 23

Sample Preparation for High Power Photomicrography— *R. G. Guthrie* 337

Secondary Crystallization in Iron-Carbon Alloys— *V. N. Krivobok* 457

Selection of Fuels for the Heat Treatment of Metal— *J. A. Doyle* 101

Soft Spots in Quenched High Carbon and Carburized Steels; Fused Salt Baths for the Prevention of— *W. J. Merten* 23

Some Fundamental Factors for Obtaining Sharp Thermal Curves— *C. Benedicks, K. G. Lund and W. H. Dearden* 445

Some Physical Properties of Low Carbon Steel— *R. H. Smith* 569

Some Revelations by Deep Etching— *J. F. Harper* 237

Special and Alloy Tool Steels; Comments on the Making and Use of— *J. A. Mathews* 147

Specific Effect of Alkalies in Carburizing Compounds— *Hugh Rodman* 635

Spectrum of Hardened Ball Steel Tempered at Various Temperatures; Density and X-Ray— *K. Heindlhofer and F. L. Wright* 34

Standards and Lowering Production Costs of Heat Treated Steel; Gas as a Factor in Improving Quality— *H. O. Loebell* 107

Steel and Iron; Causes and Controlling Factors in the Corrosion of—
W. P. Wood 321
Steel and Iron; Chemistry of— *F. T. Sisco* 197
363
494
640
Steel and Iron Specimens for Metallographic Examination; Polishing of—
C. O. Burgess and J. R. Vilella 486
Steel—Carburizing and Heat Treatment of Carburized Objects—
B. F. Shepherd 774
Steel; Gas as a Factor in Improving Quality Standards and Lowering Production Costs of Heat Treated— *H. O. Loebell* 107
Steel; Report of Sub-Committee on Tool..... 564
Steel; Some Physical Properties of Low Carbon— *R. H. Smith* 569
Steel Bars Containing Nickel Without Their Removal from the Stock Racks; Quick Qualitative Test for Nickel or Alloy—
L. W. Spring and E. W. Hutchison 657
Steel Dies; Heat Treatment of High Speed— *C. B. Swander* 727
Steel and Heat Treatment; Facts and Principles Concerning—
H. B. Knowlton
Part I 379
Part II 743
Steel Tempered at Various Temperatures; Density and X-Ray Spectrum of Hardened Ball— *K. Heindlhofer and F. L. Wright* 34
Steels; Comments on the Making and Use of Alloy Tool and Special—
J. A. Mathews 147
Sub-Committee on Spring Steels; Report of..... 696
Sub-Committee on Tool Steel; Report of..... 564
Symposium on Hardness Testing Held at Sixth Annual Convention of the Society, Boston, September, 1924..... 244

T

Test for Nickel Steel Bars or Alloy Steel Bars Containing Nickel Without Their Removal from the Stock Racks—
L. W. Spring and E. W. Hutchison 657
Test Results; A New Method of Interpreting Notched-Bar Impact—
Max Moser 297
Testing Symposium at Boston Convention of Society, September, 1924; Hardness 244
Thermal Curves; Some Fundamental Factors for Obtaining Sharp—
C. Benedicks, K. G. Lund and W. H. Dearden 445
Tool and Special Steels; Comments on the Making and Use of Alloy—
J. A. Mathews 147
Tool Steel; Report of Sub-Committee on..... 564
Treated Steel; Gas as a Factor in Improving Quality Standards and Lowering Production Costs of Heat— *H. O. Loebell* 107

Treatment; Facts and Principles Concerning Steel and Heat—
H. B. Knowlton
Part I 379
Part II 743
Treatment of Carburized Objects; Carburizing and Heat—*B. F. Shepherd* 774
Treatment of Cast Iron; Heat— *Fred Grotts* 735
Treatment of High Speed Steel Dies; Heat— *C. B. Swander* 727
Treatment of Metal; Selection of Fuels for the Heat— *J. A. Doyle* 101

U

Use of Alloy Tool and Special Steels; Comments on the Making and—
J. A. Mathews 147

V

Value of Heat Sources Versus the Fluctuating Economic Value of the B. T. U.; Intrinsic— *E. F. Collins* 82
Value of the B. T. U.; Intrinsic Value of Heat Sources Versus the Fluctuating Economic— *E. F. Collins* 82

X

X-Ray Spectrum and Density of Hardened Ball Steel Tempered at Various Temperatures— *K. Heindlhofer and F. L. Wright* 34
